PROFESSIONAL SUMMARY

Junior at the University of South Florida studying Artificial Intelligence, Business Analytics & Information Systems, building AI-powered systems that turn manual workflows into automated infrastructure. 12+ end-to-end portfolio projects including a multi-agent job application automation system running on Zapier + GPT-4o + Claude, a \$2.30M Tableau forecasting study, a 1,631-listing market intelligence dashboard, and a SEC EDGAR financial-statement ETL pipeline. Available Summer and Fall 2026 for Data, AI, and ML Engineering internships — also open to Data Analytics, BI, Information Systems, and AI Automation roles.

EDUCATION

University of South Florida — Tampa, FL

B.S. in Artificial Intelligence, Business Analytics & Information Systems

Expected Graduation: May 2027

Relevant Coursework: Business Analytics, Information Systems, Data Analysis, SQL & Databases, Programming Fundamentals (Python, Java), Statistics.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS, Java, R

AI / ML: Claude, GPT-4o, Anthropic Console, Cursor, prompt engineering, multi-agent design, LLM tool orchestration, validation loops, human-in-the-loop review

Data Engineering: ETL pipelines, schema design, API integration (OAuth, retries), SQLite-backed analytics stores, reproducible transformations, data validation

BI & Visualization: Tableau, Power BI, Streamlit, Plotly, Excel

Automation: Zapier, n8n, Google Apps Script, GitHub Actions, scheduled jobs, event-driven workflows

Tools & Workflow: Git, GitHub, VS Code, PowerShell, pytest, unittest, Markdown

SELECTED PROJECTS

Job Application Automation System — *Zapier, GPT-4o, Anthropic Claude, Google Sheets / Gmail / Calendar, GitHub* | tylerdobson.github.io/projects/job-application-automation

- Designed and shipped a multi-agent AI workflow integrating 8 tools and 5 event-driven Zaps; assigned GPT-4o to structured extraction and Anthropic Claude to reasoning and writing — running an end-to-end personal job search on autopilot.
- Built a 23-field Google Sheets Master Tracker enriched by both LLMs with fit scores, role summaries, and human-in-the-loop follow-up drafts; never auto-sends outbound email.
- Version-controlled prompts, Google Apps Script, and Zapier specs in GitHub with documented schemas and a setup checklist so a peer can rerun the system from scratch.

Decision Intelligence Lab — *Python, pandas, pytest* | github.com/tylerdobson

- Engineered modular KPI, forecasting, scenario-analysis, and recommendation engines using a 1,728-record dataset to answer defined business questions.
- Built pytest coverage across analysis modules to improve reproducibility, catch regressions, and support reliable iteration.
- Structured outputs around decision-making use cases including trend analysis, scenario comparison, and recommendation logic.

Tableau Forecasting & Discount Analysis — *Tableau* | github.com/tylerdobson

- Analyzed \$2.30M in sales (+13.6% YoY) across regions, customer segments, and product categories at a 12.4% margin.
- Produced a forecast projecting approximately \$415K in profit and isolated discount impact on profitability through dashboarding.

Airbnb Market Intelligence Dashboard — *Python, SQL, SQLite, Streamlit* | github.com/tylerdobson

- Analyzed 1,631 listings to surface pricing, occupancy, licensing, and revenue patterns; quantified \$179.46 average nightly rate and approximately \$37.66M in revenue proxy.
- Built an interactive Streamlit dashboard backed by a SQLite warehouse with reusable analytical views.

SEC Financial Statement ETL Pipeline — *Python, ETL* | github.com/tylerdobson

- Built an end-to-end ETL pipeline ingesting SEC EDGAR filings into structured balance sheet, income statement, and cash flow tables.
- Designed reproducible transformations with explicit schemas and documented assumptions for downstream financial analysis.

Additional Projects: SQL Retail & Labor Market Analysis, Job Market Skill Radar (private), Spotify Analytics, Canvas Assignment Calendar Agent, Sales Data Cleaning Pipeline, Portfolio Site. Full portfolio: tylerdobson.github.io.

CERTIFICATIONS

- **Programming with Python Professional Certificate** — OpenEDG Python Institute · May 2026 (*Python, Object-Oriented Programming*)
- **Career Essentials in Data Analysis** — Microsoft & LinkedIn · Apr 2026 (*Data Visualization, Data Analytics*)
- **Career Essentials in GitHub Professional Certificate** — GitHub · Apr 2026 (*Business Analytics, GitHub*)

EXPERIENCE

Bar Back, Oak View Group — *Tampa, FL | Part-Time | Jan 2026 – Present*

- Support beverage operations, inventory flow, and service readiness during large-scale events with 15,000–20,000+ attendees.
- Organize, track, and restock tens of thousands of products across multiple service areas under time-sensitive conditions.
- Coordinate product movement and operational support during peak-volume periods to maintain service flow and reduce bottlenecks.

Bartender, Legends Global — *Philadelphia, PA | Part-Time | May 2024 – Present*

- Deliver beverage service during large-scale events with attendance approaching 20,000 while maintaining speed, accuracy, and guest experience.
- Process 200+ transactions per shift across Clover, Toast, and Micros POS systems with accurate cash and card handling.
- Coordinate with team members during peak-volume periods to keep workflow organized and guest communication clear.

LEADERSHIP

Social Resources Chair, Alpha Epsilon Pi Fraternity (Psi Phi) — *Nov 2025 – Present*

- Coordinate event logistics, resource planning, vendor communication, and executive board updates under budget and compliance constraints.

National Society of Leadership and Success (NSLS) — *Sep 2024 – Present*

- Completed leadership development covering communication, accountability, team development, and public speaking.

Future Business Leaders of America, University of South Florida Chapter — *Member | Current*

- Participate in chapter programming covering business leadership, career-readiness, and professional networking with peers across business, analytics, finance, and information systems.
